

Chesapeake Bay TMDL and Virginia Watershed Implementation Plan

Hampton Roads Planning District Commission

October 20, 2010

Agenda Item #13

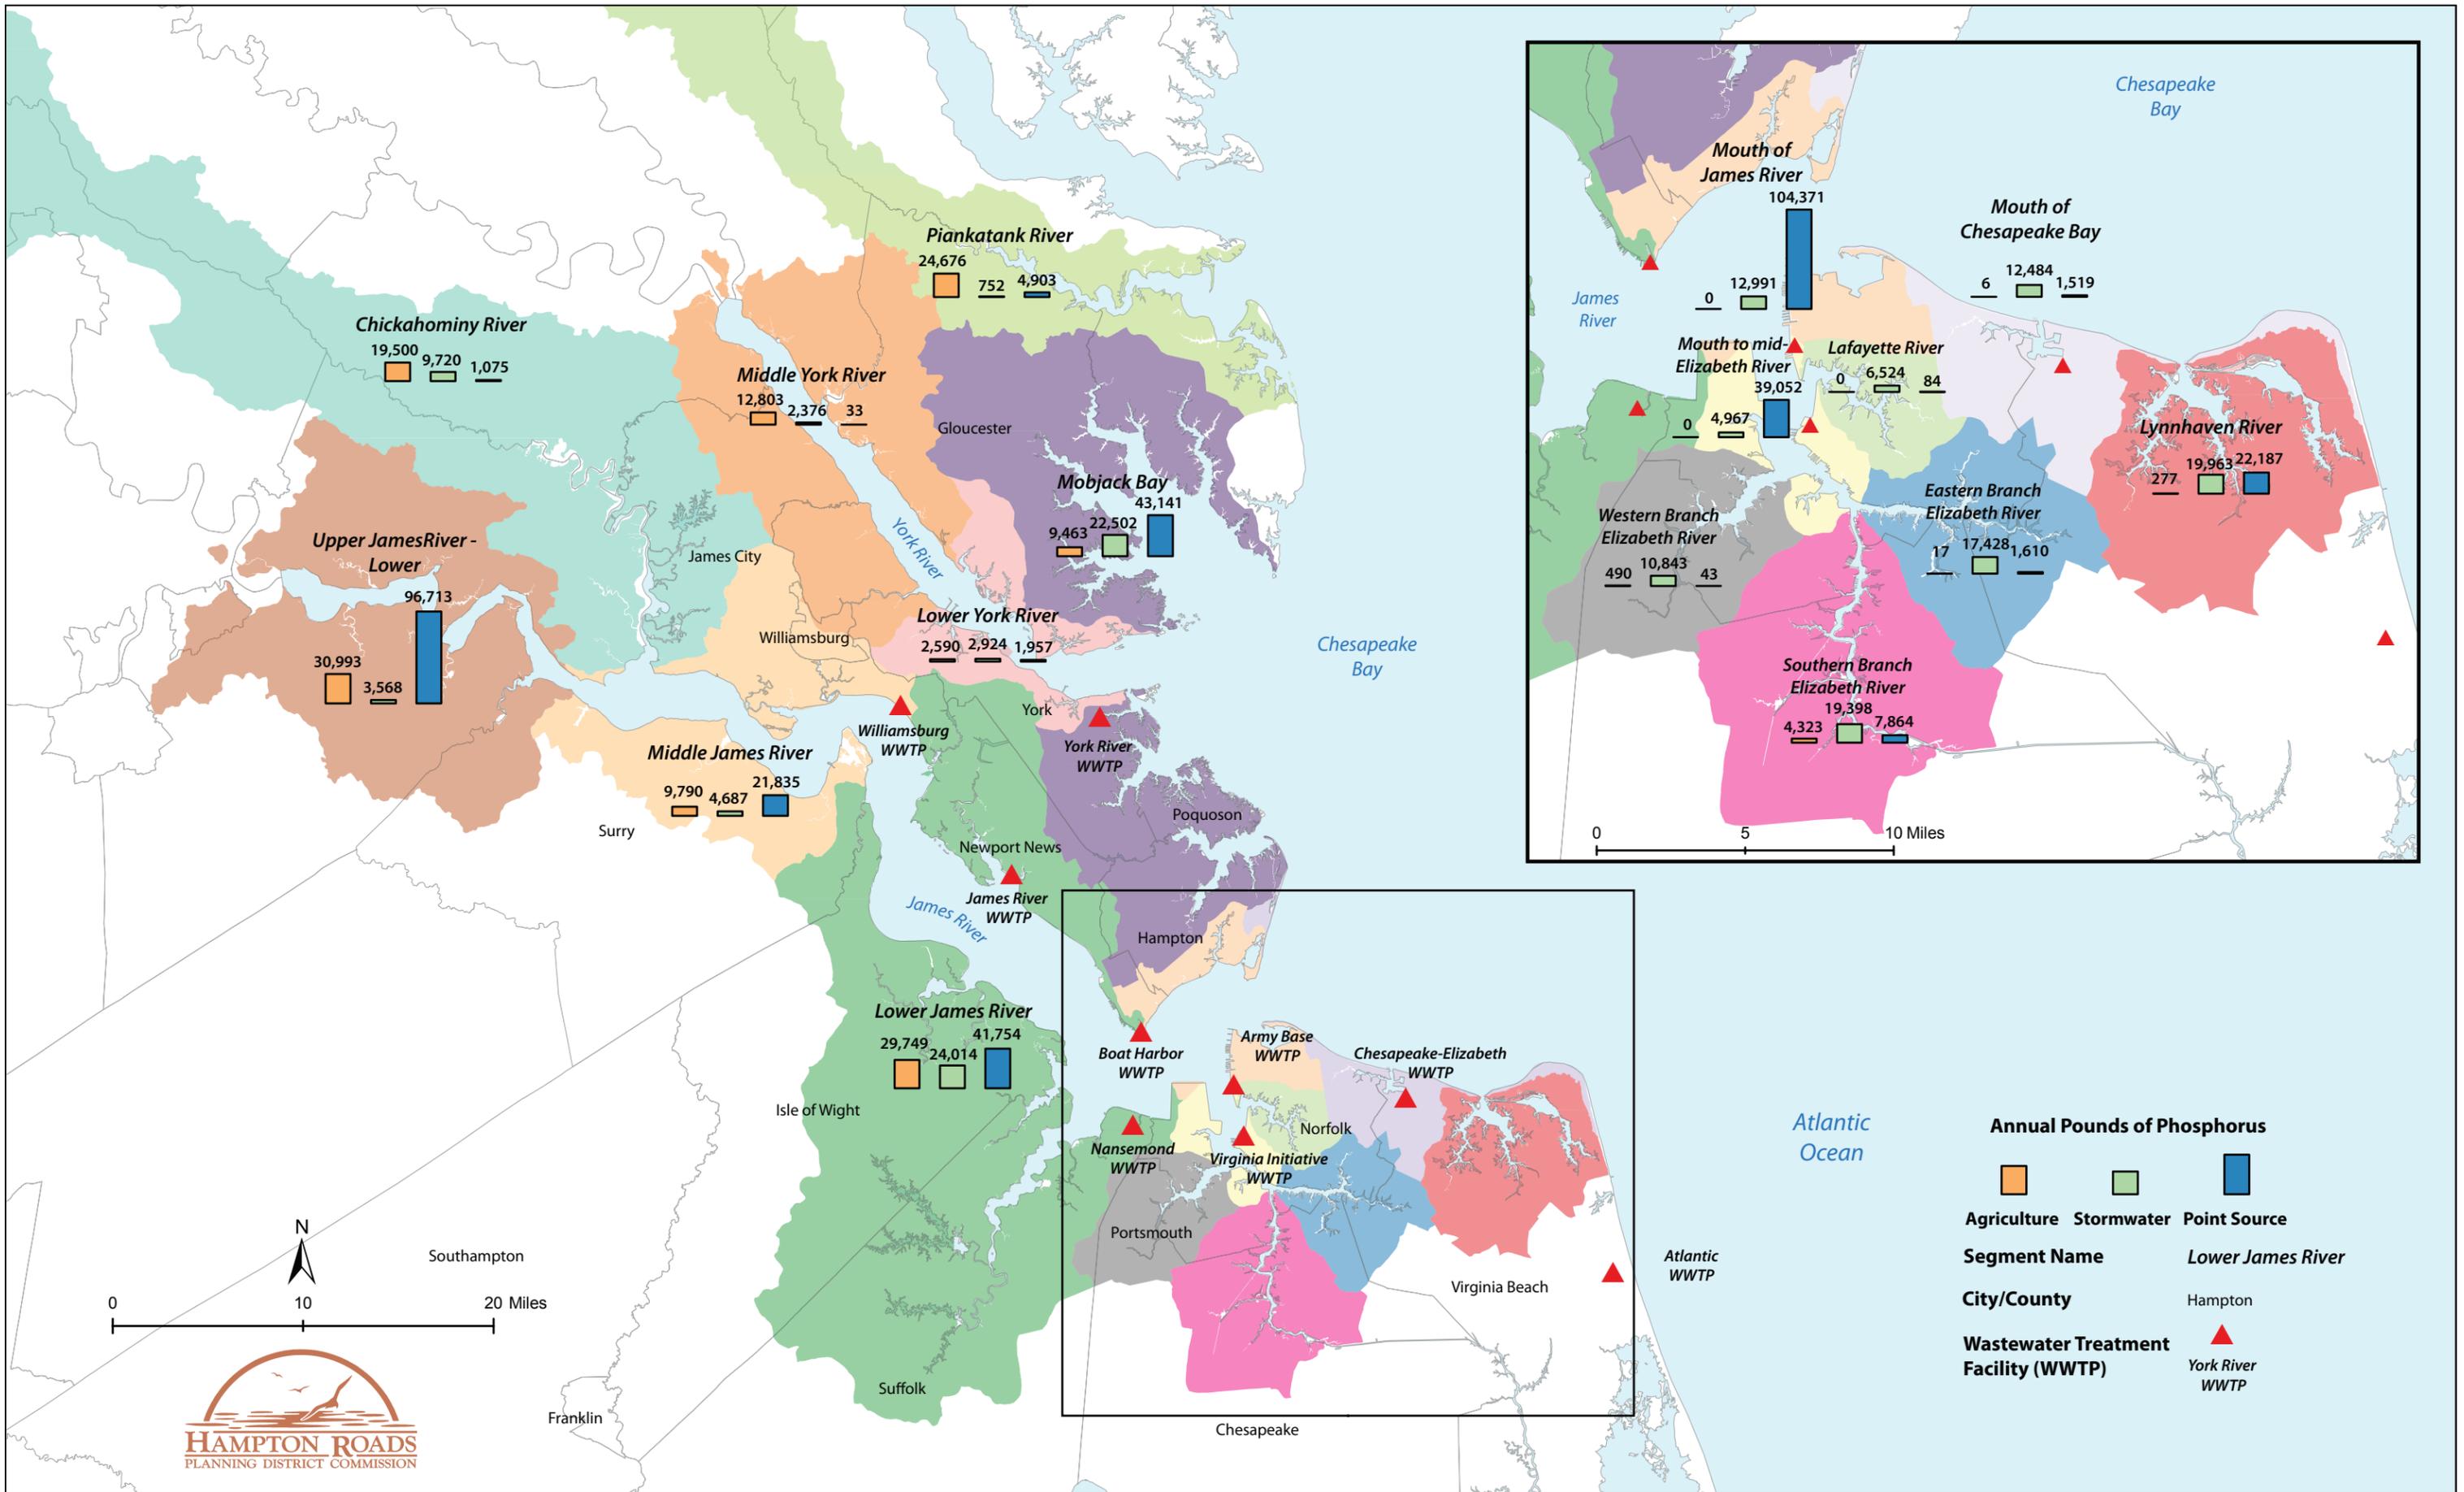

AGENDA NOTE- HRPDC ANNUAL COMMISSION MEETING

ITEM #13: CHESAPEAKE BAY TMDL AND VIRGINIA WATERSHED IMPLEMENTATION PLAN

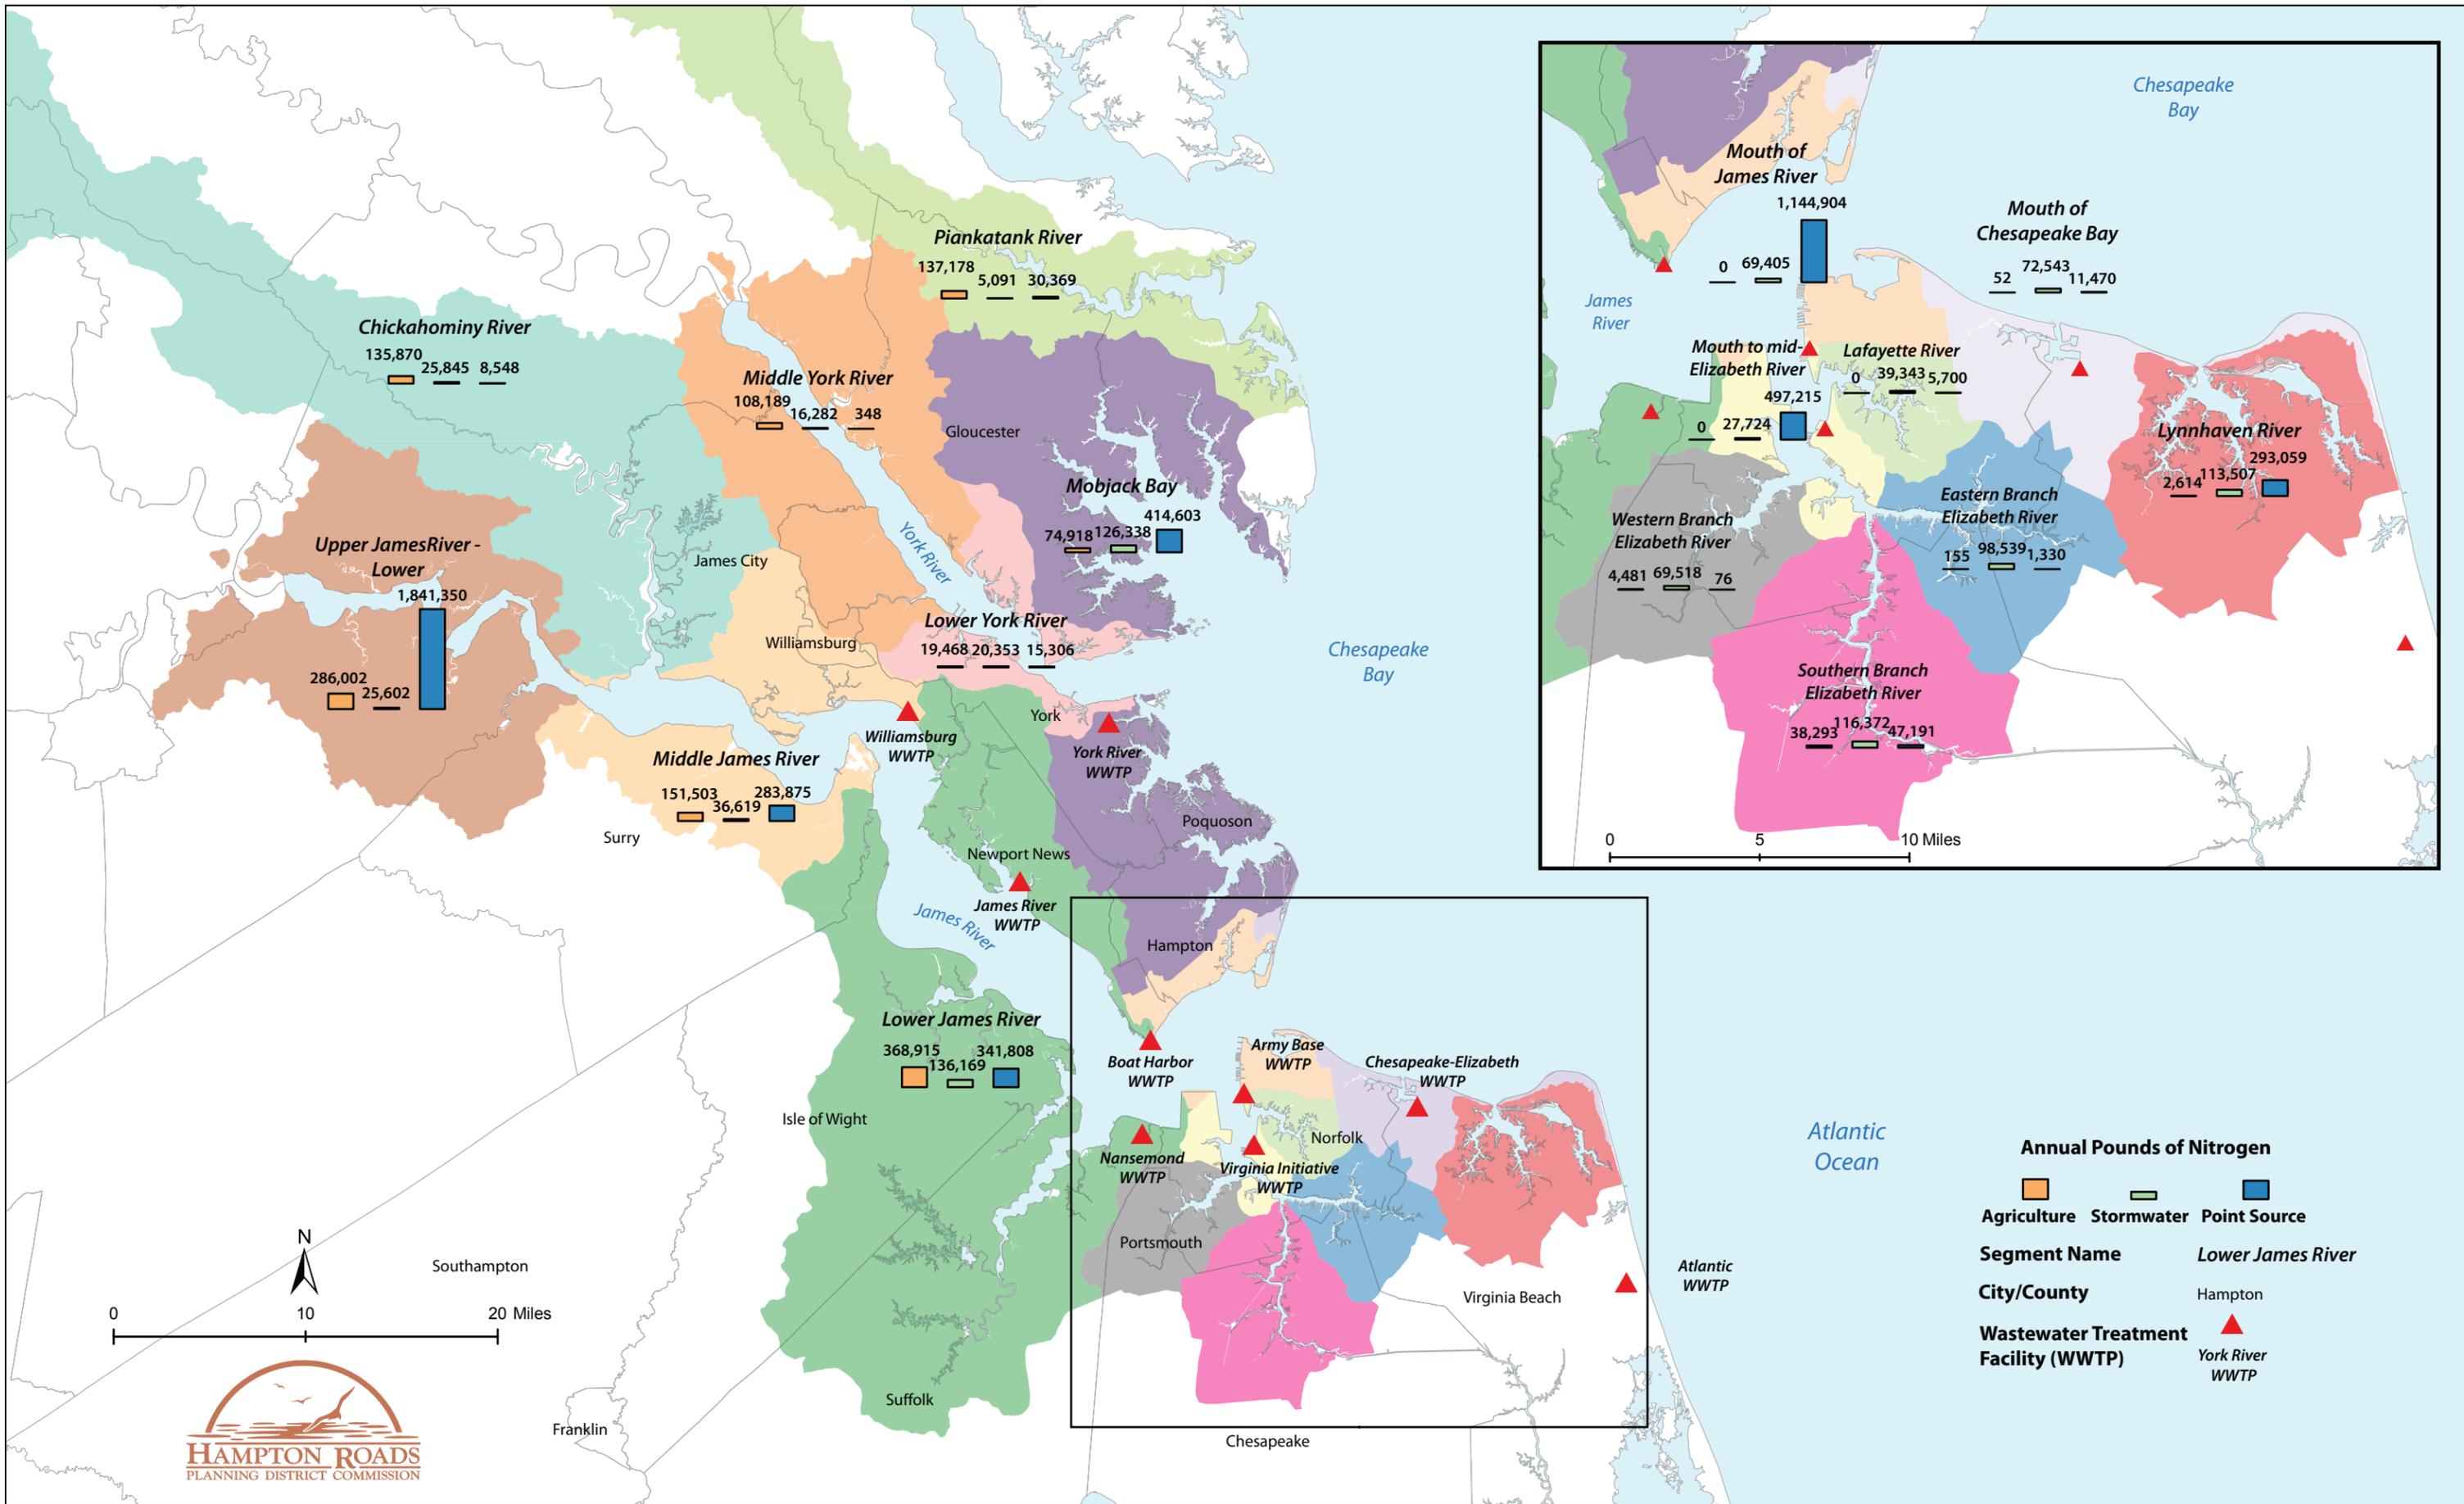

Attached is a map of the Chesapeake Bay Watershed Segments located, at least partially, in Hampton Roads. The map depicts 2010 Phosphorus and Nitrogen Pollutant Loadings for the primary sectors – Agriculture, Stormwater, and Point Sources. It also shows the location of the several HRSD Wastewater Treatment Plants. Based on these loadings, reductions will have to be made within the segments by the sectors, such as urban stormwater or outside the segment through trading to the extent that is allowed. The segment allocation will be a key feature of the Virginia Watershed Implementation Plan – Phase II, which is due in 2011. The HRPDC staff presentation will address this map in more detail.
