RE: **Regional Grease Hauling Requirements**

HAMPTON

Dear **Hauler**:

ISLE OF WIGHT

You are receiving this letter because you are a grease hauler certified through the Hampton Roads Planning District Commission's Regional Grease Hauler Program. We'd like to thank you for the service you provide to food service establishments in Hampton Roads and ask for your support of local programs in place to keep our sanitary sewer system flowing properly.

JAMES CITY

NEWPORT NEWS

NORFOLK

For several years now, localities across the region have been implementing programs in an effort to prevent the discharge of Fats, Oils and Grease (FOG) into the sanitary sewer system. The programs currently in place range from educational outreach to enforcement and inspection programs mandated by local FOG ordinances. As local programs continue to evolve, we need your support to ensure food service establishments have access to the information that is required of them.

PORTSMOUTH

SMITHFIELD

Attached is a breakdown of "Best Practices for Grease Hauler Service Tickets/Forms in Hampton Roads." Having this information accessible is very important for food service establishments during their FOG inspections. Also attached is a sample grease control device cleaning log. This log must be maintained by all FSEs undergoing inspections and illustrates the need for adequate measurements during your GCD service visits. By providing your customers with this information, you are helping to ensure they operate under an adequate cleaning schedule, have proper documentation of all cleanings and required GCD maintenance, and remain in compliance with local ordinances.

VIRGINIA BEACH

Please note that some jurisdictions require each individual who hauls grease in Hampton Roads to carry the FOG Regional Grease Hauler Certification. This is a free certification for haulers that is available online through the [www.HRFOG.com](http://www.HRFOG.com) website. Once completed, recertification is required every three years.

WILLIAMSBURG

YORK

Thank you again for your support of this initiative and for helping to keep grease control devices at our local food service establishments properly serviced and maintained. To learn more about the Regional Grease Hauler Online Certification Program, please go to [www.HRFOG.com](http://www.HRFOG.com).

Sincerely,

Randy Keaton  
HRPDC Interim Executive Director
