

Welcome to Bay Star Homes!

You are now part of a movement towards cleaner waterways, healthier habitats, and action-oriented residents! You make the difference and our waterways depend on you!

We are delighted for your participation during the launch of our program, and we hope that you continue to support Bay Star Homes as we grow and develop.

One of the many benefits of being a Bay Star Home is that our program is easy and FREE. Now that you have picked your first seven steps to help clean up our natural waterways, we invite you to perform soil testing on your lawn. Information regarding soil sampling and testing can be found in your welcome packet.

Please take the time to look over the information in your welcome packet and place your new yard flag out to show your support for our beautiful, natural waterways! For additional information, please contact **LOCALITY REP** at **EMAIL ADDRESS** or by telephone at **555-555-5555**.

We look forward to working with you!
