

Figure 3.4 Components of Population Change in Hampton Roads

Why is it important?

Changes in regional population are due to births, deaths, and migration. Reviewing the components of population provides a clearer picture as to changes in a region's demographics.

How are we doing?

There was significant net out migration during the second half of the nineties and the second half of the aughts with a period of high volatility between. This outmigration is the reason Hampton Roads has a low level of population growth.
