

5.8 Hampton Roads Vehicle Registrations

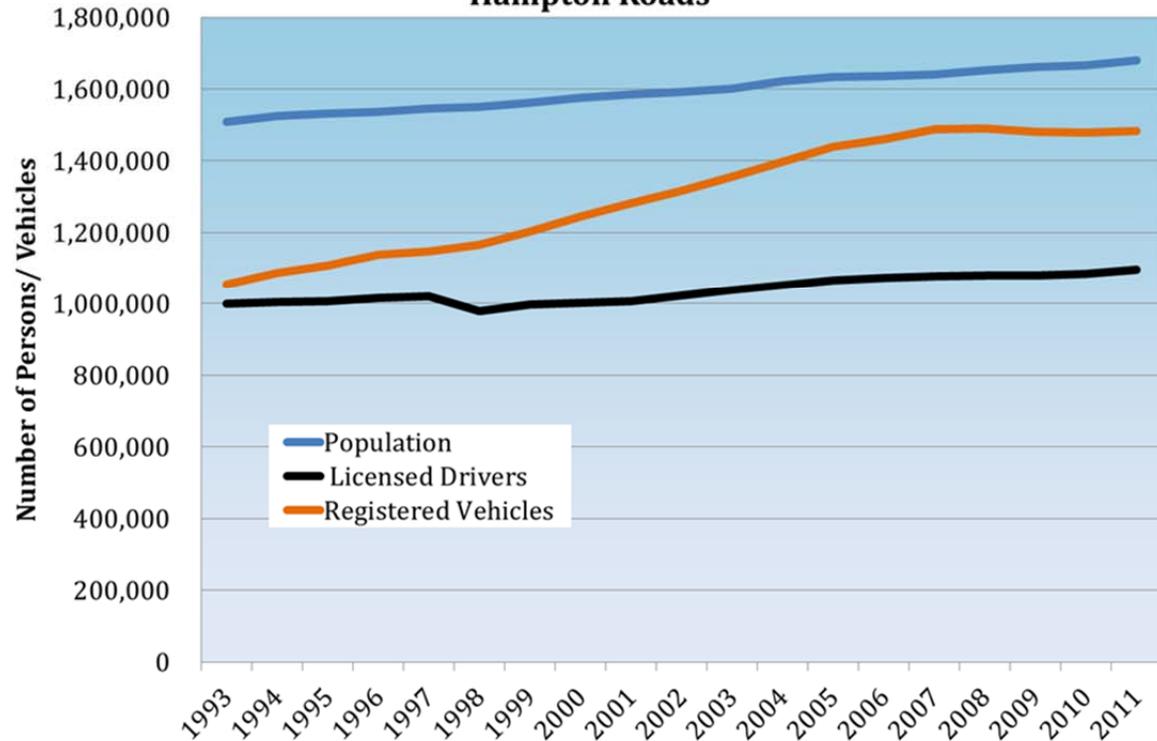

Why is it important?

Population, the number of licensed drivers, and the availability of automobiles are all factors in determining automobile usage.

How are we doing?

As the Hampton Roads population increases, so do the number of licensed drivers. Precipitous growth in the number of registered vehicles has increased the availability of automobiles subsequently increasing the number of vehicles on the road, though that growth leveled off since the recession.

Population, Registered Vehicles, & Licensed Drivers in Hampton Roads
