REGIONAL GROUNDWATER MITIGATION PROGRAM ADMINISTRATION

MEMORANDUM OF AGREEMENT

WHEREAS, Section 15.2-1300 of the Code of Virginia enables local governments to enter into cooperative agreements to exercise those powers that each may be enabled to exercise, including conducting technical analyses to support such activities; and

WHEREAS, Section 15.2-4200 of the Code of Virginia enables local governments to establish Planning District Commissions; and

WHEREAS, the cities and counties that are signatories to this Agreement have acted, in accordance with Section 15.2-4200 of the Code of Virginia to establish the Hampton Roads Planning District Commission; and

WHEREAS, several Towns in the Hampton Roads region operate groundwater based water supply systems and

WHEREAS, the Hampton Roads Planning District Commission has been requested and has undertaken various studies to support local government water supply development, including groundwater resource management efforts; and

WHEREAS, on behalf of the signatory parties, the Hampton Roads Planning District Commission, has contracted with the U.S. Geological Survey to complete various technical analyses of the region's groundwater resources, including development of a methodology for allocating responsibilities for groundwater impacts, as documented in Michael J. Focazio and Gary K. Speiran, Estimating Net Drawdown for Episodic Withdrawals at Six Well Fields in the Virginia Coastal Plain Aquifers, U.S. Geological Survey, Water Resources Investigations Report No. 93-4159, 1992; and

WHEREAS, the signatory parties have requested the Hampton Roads Planning District Commission to administer a Regional Groundwater Mitigation Program, on their behalf; and

WHEREAS, on August 11, 1994, the signatory parties entered into the Groundwater Mitigation Program Administration Agreement; and

WHEREAS, on May 31, 2000 and July 5, 2006, the signatory parties extended the Groundwater Mitigation Program Administration Agreement; and

WHEREAS, in accordance with the provisions of the August 11, 1994 Agreement, as extended on May 31, 2000 and July 5, 2006, the signatory parties have evaluated the Groundwater Mitigation Program and determined that the Program should be continued;

NOW THEREFORE, the signatory parties enter into the following Agreement.

This Memorandum of Agreement, entered into this 18th day of March, 2010

among and between fifteen local governments in Hampton Roads, James City Service Authority and the Hampton Roads Planning District Commission, establishes and extends the Regional Groundwater Mitigation Program. It outlines the roles and responsibilities of each entity in administering and funding the Regional Groundwater Mitigation Program.

BASIC PREMISES

1. Some local governments in Hampton Roads operate public water supply wells inside and/or outside of their incorporated boundaries.
2. All local governments in Hampton Roads are interested in ensuring that groundwater drawdown associated with the operation of public water supply wells does not adversely impact the private wells of their citizens.
3. In the case where operation of a public water supply well causes or contributes to groundwater drawdown that renders a well unusable, then mitigation of damages attributable to that drawdown may be sought by the well owner in accordance with local mitigation plans and agreements.
4. This Agreement establishes the administrative framework, which will be used by the signatory parties to obtain technical analysis of requests for mitigation by private well owners or other local governments in Hampton Roads. Financial issues related to these requests are governed by existing interjurisdictional agreements and state-approved Groundwater Mitigation Plans that are separate and distinct from this Agreement.
5. This Agreement will have a term of five years, extending from January 1, 2011 through December 31, 2015. To conform to local government charter and Virginia Code requirements, the funding provisions of this Agreement will be subject to annual renewal.
6. Program costs will be allocated on a pro-rata basis among the signatory parties. There will be a base buy-in of \$3,000/year per city or county with the balance of annual costs allocated according to the local share of regional population. The most current estimate of population, developed by the Center for Public Service, will be used as the population base for allocating program costs. Local contributions will be escalated annually to reflect program experience and projected HRPDC expenditures. Future private sector and non-Hampton Roads local government will provide financial support to the program according a yet-to-be-determined formula, which will reflect annual program costs. The funding formula will be evaluated on a regular basis by the HRPDC Directors of Utilities Committee and may be adjusted to ensure its continued equitability.

HRPDC RESPONSIBILITIES

Under the terms of this Agreement, the Hampton Roads Planning District Commission is responsible for the following:

1. Conduct technical analyses of the impacts of groundwater withdrawals.
2. Respond equitably and in a timely fashion to requests from all signatory parties for analyses of the impacts of groundwater withdrawals. The time frame for responses will be based on experience and the complexity of individual cases.
3. Develop technical recommendations on allocation of impact mitigation responsibilities among the signatory parties. Initially, this determination will be based on application of the superpositioning methodology developed by the U.S. Geological Survey for the Hampton Roads Planning District Commission. This methodology is described in Michael J. Focazio and Gary K. Speiran, Estimating Net Drawdown for Episodic Withdrawals at Six Well fields in the Virginia Coastal Plain Aquifers, U.S. Geological Survey, Water Resources Investigation Report No. 93-4159, 1992. It is understood that the superpositioning methodology applies to intermittently pumped wells and not to continuously pumped production wells.
4. Provide report(s) documenting the results of its technical analysis (es) to all signatory parties.
5. In any case where an aggrieved party appeals a local government mitigation determination, provide the HRPDC analysis to the mitigation panel, established under the local government's mitigation plan. However, the HRPDC will not serve as a member of the mitigation panel.
6. Provide other technical support, as requested, to the signatory parties for other groundwater analyses, including support for development of local groundwater withdrawal permit applications and review of other proposed groundwater withdrawals which may impact on groundwater resources in the Hampton Roads region.
7. On request, provide technical staff support, at cost, to signatory parties for data collection (field work), required by that signatory party's permit or mitigation plan, approved by the Department of Environmental Quality (State Water Control Board).
8. Develop staff capability to conduct more comprehensive impact analyses using the U.S. Geological Survey Virginia Coastal Plain Model. It is anticipated that use of this model will provide for analysis of both continuously and intermittently pumped wells, operated by both the public and the private sector.
9. Take steps, in conjunction with the signatory parties, to involve private sector groundwater users in the Regional Groundwater Mitigation Program. Administrative procedures and financial arrangements for private sector and non-Hampton Roads local government participation will be developed in the

future, but will reflect the actual cost of the work.

LOCAL GOVERNMENT RESPONSIBILITIES

Under the terms of this Agreement, the signatory parties are responsible for the following:

1. Serve as the initial point of contact for aggrieved parties. Request mitigation analyses from HRPDC in a timely fashion following receipt of a claim.
2. Provide any locally-generated/collected data on groundwater conditions and well construction that may be useful to HRPDC technical analyses.
3. Provide, in a timely fashion, all technical supporting data required by Mitigation Plans, approved by the Department of Environmental Quality (State Water Control Board) as elements of Groundwater Withdrawal Permits, to the HRPDC for use in analyses of mitigation claims.
4. Provide timely technical review of the HRPDC analyses and conclusions.
5. Support HRPDC efforts to expand the mitigation program to cover all groundwater uses.
6. Establish the appropriate mitigation panels, in accordance with local mitigation plans, to hear appeals of initial mitigation responsibility determinations.

PROCEDURE FOR REQUESTING MITIGATION ANALYSES

Under this Memorandum of Agreement, the following process will be followed to request HRPDC technical support to address mitigation claims.

1. Aggrieved party contacts the locality of residence.
2. The local government contacts the HRPDC and requests that an impact analysis be conducted. In addition, any signatory parties may request that an impact analysis be undertaken.
3. The HRPDC conducts the analysis, as requested, and advises all signatory parties of the results of the technical analysis(es).
4. This procedure may be modified from time to time with the concurrence of all signatory parties, as represented by the HRPDC Directors of Utilities Committee, in order to improve the efficiency of the mitigation process.

SIGNATORIES

This Memorandum of Agreement will be executed by the Chief Administrative

Officer of each participating local government or service authority and by the Executive Director of the HRPDC. Individual signatory pages are included for each participating locality.
