Celebrating the Power of Wind, Clean Energy and a Green Environment

At KidWind, It Starts with the Teachers

You want to see pride? Come to a KidWind regional competition, like the one at ODU this past week, and look at the faces of the educators as their teams test their wind turbines and solar paneled displays before industry judges.

Celebrating the Power of Wind, Clean Energy and a Green Environment

The English are Coming! And So are the Texans, Spanish and Others as the Offshore Wind Supply Chain Grows in Hampton Roads

Have you heard of Sea Jacks? It's a 16-year-old company from Great Yarmouth, England that operates self-propelled jack-up vessels used to install and maintain offshore wind turbines and foundations. They've done more than 500 worldwide and now have a small office at Gather in VA Beach Town Center, presumably to help construct and maintain Dominion's CVOW project. In fact, Sea Jacks is already providing support for the massive half-billion dollar Charybdis transport vessel Dominion is having built in Texas.
