ABSTRACT

The Hampton Roads Planning District Commission (HRPDC) is one of 21 Planning District Commissions in the Commonwealth of Virginia and is a regional organization representing the 17 local governments of the Hampton Roads area. This report provides an overview of the askHRgreen.org regional public outreach program and campaign results for fiscal year 2019-2020. It also provides an overview of the individual initiatives and results from each of the four askHRgreen.org environmental education committees: Recycling and Beautification, Stormwater Education, Water Awareness, and Fats, Oils & Grease Education.

ACKNOWLEDGEMENTS

This report was prepared by the HRPDC staff in cooperation with the member localities. Preparation of this report was included in the HRPDC Work Program for Fiscal Year 2020, approved by the Commission in May 2019.

About askHRgreen.org

Launched in 2011, askHRgreen.org is more than just a robust website; it is an award-winning comprehensive public outreach initiative. The program combines traditional and social media with grassroots outreach efforts to not only educate, but inspire residents of Hampton Roads to make changes that have a positive impact on the environment. By combining local expertise and taking advantage of economies of scale, the askHRgreen.org program is able to help local jurisdictions fulfill requirements of MS4 permits, groundwater withdrawal permits, and state consent orders to reduce sanitary sewer overflows. For citizens, it has become a “one-stop shop” to find answers, resources, and inspiration for a cleaner, greener Hampton Roads. From earth-friendly landscaping ideas and pointers for keeping local waterways clean to recycling tips and simple steps to make local living easy on the environment, all you have to do is askHRgreen.org.

Financial support for askHRgreen.org is made possible by the following member localities and agencies: the cities of Chesapeake, Franklin, Hampton, Newport News, Norfolk, Poquoson, Portsmouth, Suffolk, Virginia Beach and Williamsburg; the counties of Gloucester, Isle of Wight, James City, Southampton, Surry and York; the town of Smithfield and HRSD. Members of local staff and HRSD comprise four askHRgreen.org committees who meet monthly to develop and implement the regional program.

Recycling and Beautification Committee - A coalition of local government staff members from across Hampton Roads who are working together to share ideas and pool resources for various education programs tailored towards community beautification, litter prevention, waste reduction, and recycling education. This group has been working cooperatively since 1981.

Fats, Oils, and Grease (FOG) Education Committee - A coalition of local government staff members working together with HRSD to protect wastewater infrastructure, reduce sanitary sewer overflows, and improve local water quality. The Committee shares both technical resources and educational strategies to prevent improper disposal of fats, oils, and grease. This cooperative effort has been underway since 2007 when 13 of the region's localities and

HRSD entered into the Regional Special Order by Consent with the Virginia Department of Environmental Quality.

Water Awareness Committee - Regional public utilities staff members who work together to educate citizens about aging infrastructure, the value of tap water, and the importance of water conservation. This cooperative effort to promote the vital role water plays in the quality of life of Hampton Roads and the need to conserve it assists localities in meeting requirements of various locality goals as well as water supply and ground water permit education requirements.

Stormwater Education Committee - A cooperative partnership of the region's seventeen member cities and counties which has served as a formal adjunct to the required public information component of the Virginia Pollution Discharge Elimination System Permits (VPDES) for Phase I and Phase II Municipal Separate Storm Sewer Systems (MS4) since 1997. Local government staff members work together to share ideas and pool resources for various education programs tailored to stormwater pollution prevention.

A message about COVID-19

Like nearly every other operation around the globe, our askHRgreen.org public outreach program felt the impacts of the COVID-19 pandemic in FY20. Special events were cancelled, planned promotions were put on hold, and we shifted our focus to virtual outreach as much as possible. As people stayed home, waste reduction and responsible disposal practices became a major theme in communications. Public interest in gardening and landscaping surged. The pomp and circumstance that would have surrounded the 50th anniversary of Earth Day in April was replaced with “Fifty Ways to Celebrate Earth Day While Social Distancing.” And as schools shut down and remote learning began, askHRgreen.org published weekly virtual lesson plans to keep students at all levels engaged in environmental education principles. Despite the challenges, our regional team members continued to work together to find new, innovative ways to encourage the citizens of Hampton Roads to implement green practices in their daily lives...even in these most uncertain times.

HIGHLIGHTS

fourteen million *opportunities* to see or hear about askHRgreen.org 

 73,379 visitors to askHRgreen.org

19 *community events* with over 86,000 people in attendance 

BAY STAR PROGRAMS

 3,383 homes  50 businesses

 8,096 students impacted by \$10,073 in environmental education mini grants

awarded 33 *pet waste disposal stations* impacting in neighborhoods across the region 

 Launched interactive *recycling lookup tool*

\$8,000 *grant funds* received for special projects

Promotions & Website Traffic

Website Analytics

The askHRgreen.org website continues to be the cornerstone of our outreach efforts where campaign news and events are featured prominently and content is delivered seamlessly to users on all types of devices. In FY20, we saw a 25% increase in website traffic over FY19

and a 36% increase in webpage views – up to over 117,000. The majority of web traffic continues to be new visitors, demonstrating the growing awareness and effectiveness of our outreach efforts.

Search Engine Marketing

The askHRgreen.org Search Engine Marketing (SEM) program employs Google pay-per-click advertising to increase traffic to the website. By bidding on select keywords and phrases, our ads direct search traffic to relevant content on the askHRgreen.org website. In FY20, we had more than 340,000 Google search impressions – up 63% over FY19. Those searches drove over 12,000 clicks to relevant content on the askHRgreen.org website. Our electronics disposal and recycling topics routinely lead the campaign in terms of impressions and clicks, but in FY20, we saw a substantial spike in search traffic for lawncare-related keywords - 62,000 ad impressions in that category between March and June. The stay-at-home orders in place during that time may have contributed to the increase. See appendix A for the full SEM campaign report for FY20.

Search Engine Marketing Results

	2019-20	2018-19	2017-18	2016-17	
Impressions	342,690	210,695	169,140	107,920	+63%

Community Outreach

Events

AskHRgreen.org is invited to attend a multitude of community events each year. These events serve as a vital opportunity for our regional committee members to interact with residents and visitors to Hampton Roads. The events span a variety of themes from eco-events to employee appreciation days, regional fairs, concerts, and more. Although some events have an environmental focus, many others appeal to the general public and allow interaction with new audiences who may be learning about eco-friendly behaviors for the very first time. The recently updated askHRgreen.org mobile outreach and education trailer is an important engagement tool for these events. Volunteers staff the trailer at special events and distribute a variety of resources from informational brochures and rack cards to reusable shopping bags, stainless steel straws, rain gauges, and a variety of other eco-themed promotional items. In addition, attendance at these events puts askHRgreen.org messages in front of large audiences.

In FY20, we had the opportunity to interact with more than 86,000 event goers across the Hampton Roads region. Due to COVID-19, our spring and early summer events were cancelled, but we look forward to more outreach events once these types of large gatherings can resume.

2019-2020 Community Events			Estimated Attendance
8/9	TGIF Summer Concert Series	Suffolk	3,000
9/7	Go Green Expo	Newport News	1,100
9/12	Isle of Wight County Fair	Windsor	35,170
9/14	Community Engagement Event @ VB Sportsplex	Virginia Beach	4,000
9/19	Third Thursdays Live at City Center	Newport News	150
9/28	Bow Creek Block Party	Virginia Beach	130
9/28	Roland Park Civic League Fall Cookout	Norfolk	70
10/3	CNU Farmer's Market	Newport News	100
10/10 -	Peanut Festival	Suffolk	25,000
10/10	CNU Farmer's Market	Newport News	50
10/12	Lynnhaven River Now Fall Festival	Virginia Beach	3,000
10/12	Great Bridge High School Craft Show	Chesapeake	500
10/24	Public Works Fall Picnic	Virginia Beach	520
11/12	Anthem Eco Fair	Virginia Beach	150
11/14	Anthem Eco Fair	Norfolk	250
1/13 - 1/16	Mid Atlantic Horticulture Short Course & Home Gardener Day	Norfolk	762
1/25	Jam'n Jamz	Norfolk	500
1/28 - 1/29	Newport News Shipbuilding Health and Safety Expo	Newport News	4,076
3/7 - 3/8	Mid Atlantic Home & Outdoor Living Show	Virginia Beach	8,125
4/4 - 4/5	<i>Daffodil Festival</i>	<i>Gloucester</i>	<i>Cancelled</i>
4/11	<i>Go Green Market</i>	<i>Yorktown</i>	<i>Cancelled</i>

4/25	<i>Paradise Creek Earth & Arbor Day</i>	<i>Portsmouth</i>	<i>Cancelled</i>
4/25	<i>12th Annual Community Empowerment Fair</i>	<i>Newport News</i>	<i>Cancelled</i>
4/25	<i>Spring Fling</i>	<i>Hampton</i>	<i>Cancelled</i>

Bay Star Homes

FY20 was the fourth year of operation for the Bay Star Homes program. This community-based recognition program encourages residents to avoid environmentally-harmful behaviors in their home and be proactive about using voluntary stormwater management practices such as rain barrels, rain gardens, and downspout disconnects on their private property. Residents pledge to do at least eight environmentally-friendly practices as part of the program. Pledges include stormwater best practices as well as other desirable behaviors such as waste reduction, water conservation and energy reduction. In FY20, the total number of participating households for the Bay Star Homes program rose to 3,383, an increase of 279 new households over the previous year.

Bay Star Homes Registrants	
City/County	Number
Chesapeake	149
Franklin	13
Gloucester	19
Hampton	119
Isle of Wight	9
James City	12
Newport News	229
Norfolk	2301
Poquoson	17
Portsmouth	39
Smithfield	13
Southampton	4
Suffolk	139
Surry	3
Virginia Beach	236
Williamsburg	8
York	72
Total	3,383

Great American Cleanup

For a second year, the askHRgreen.org Recycling & Beautification Committee worked together to clean up and beautify Hampton Roads through the Great American Cleanup (GAC). A part of the committee's "Team Up 2 Clean Up" initiative, GAC engages the public and business community to get involved in beautification projects throughout the region. For FY20, Friday, March 27 and Saturday, March 28 were designated as the regional GAC dates. Over 350 volunteers, including businesses and military commands, signed up to participate in a variety of events during the two-day initiative. Planned projects included neighborhood cleanups, sprucing up local parks, removing litter from roads and waterways, mulching and weeding community gardens, and planting new gardens and trees.

The regional effort caught the attention of state and national partners including Keep Virginia Beautiful, Keep America Beautiful, and the Earth Day Network. The GAC events paired well as a kick off to Earth Month in April 2020, leading to the celebration of the 50th Earth Day on April 22. Unfortunately, in the week leading up to the events, coronavirus began to spread across the United States and stay-at-home orders forced the cancellation of all planned activities. The committee hopes to reschedule the cleanup initiative for September 18-19, 2020 as litter pickup becomes increasingly important due to the growing amount of litter from personal protective equipment (PPE) and hand sanitizing supplies.

Imagine a Day Without Water

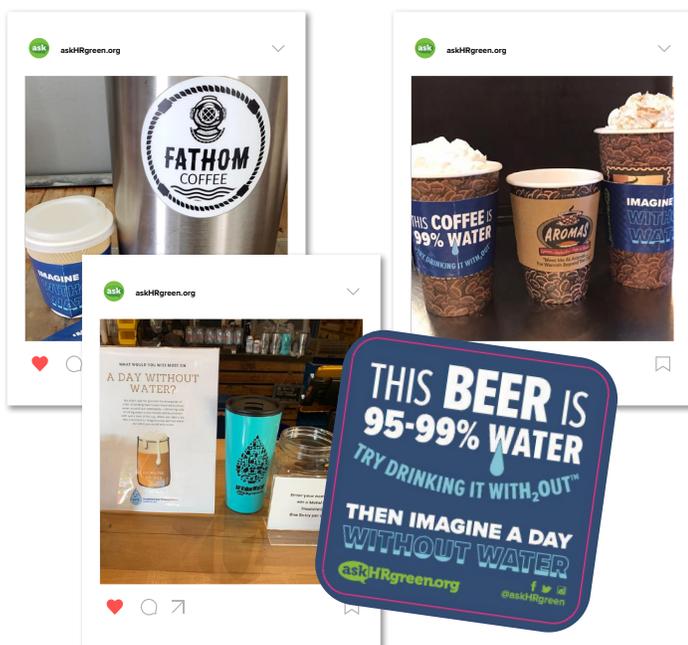

Municipal water services are vital for quality of life in Hampton Roads. Both residents and businesses rely on a consistent supply of tap water to power their days. Breweries and coffee shops are particularly dependent on clean, reliable tap water to brew their custom crafted beverages. For a second year, the askHRgreen.org Water Awareness Committee engaged these natural advocates for clean water as part of a national advocacy and awareness promotion, Imagine a Day Without Water, that addresses the importance of maintaining our water and wastewater systems. Partnering breweries and coffee shops were given branded coffee sleeves or coasters to distribute to customers. The coffee sleeves and coasters convey the message that coffee and beer are 95-99 percent water and neither would be possible without tap water.

In total, the campaign engaged 25 breweries and coffee shops through this campaign. The coffee sleeves and coasters were distributed starting on October 23, 2019, the national recognition day for Imagine a Day Without Water, and continued while supplies lasted. The campaign also included a strong organic social media campaign with partnering businesses. All partners were offered a special #ValueWater tumbler to raffle off to customers or social media followers. The added giveaway component, new in FY20, increased the reach of the campaign through social media and resulted in positive co-branding opportunities

with coffee shops and breweries seen as trusted local brands that often have a dedicated following.

Straw-Free September

Following up on the success and popularity of Straw-Free Earth Day in April 2019, the askHRgreen.org Recycling & Beautification Committee continued to recruit restaurants to go straw-free in FY20. In a special partnership with Keep It Beachy Clean and Clean Virginia Waterways, the committee encouraged restaurants to be a part of “Straw-free September Days” and supply customers with straws only upon request during the month-long promotion. The initiative was coordinated in support of the International Coastal Cleanup, which happens annually in September. Participating restaurants received a supply of paper straws to provide to customers who requested a straw during the promotion, as well as branded window clings, menu cards, table tents, and educational placemats. All of the materials reinforced the “skip the straw” waste reduction message. Twenty restaurants across seven localities participated in the Straw-Free September Days initiative. While the 2019 Earth Day initiative focused solely on a specific straw-free weekend, FY20 promotional efforts shifted the focus to encouraging a lasting change to restaurant policy. Some restaurant partners have indicated that participating in the straw-free campaigns has led to permanent change in their policy towards providing straws to guests.

Environmental Education Lesson Plans

In response to coronavirus safety protocols, public schools throughout Hampton Roads closed for in-person learning in late March. Public schools and parents scrambled to continue education via a virtual platform but few were prepared to operate in a completely online environment. In order to assist teachers and parents in need of content for daily lesson plans, askHRgreen.org crafted nine weeks of environmentally-themed lesson plans for elementary and middle school students. While not targeted at specific Virginia Standards of Learning (SOLs), the lesson plans covered topics such as the water cycle, watersheds, wastewater treatment, Earth Day, waste reduction, drinking water, marine debris, biodiversity and healthy habitats, and sustainable living. Many SOL-based activities were pulled from the previously published Green Learning Guides created by askHRgreen.org for third and sixth grade students. The lessons were well received by teachers and parents in need of new ways to keep their young learners engaged during this detour from a formal education atmosphere.

Environmental Education Mini Grant Program

Supporting environmental education in the classroom continues to be a priority of askHRgreen.org. The Mini Grant program offers all Hampton Roads teachers (K-12), youth leaders, or organizations working with youth mini grants of up to \$500 to provide funding for environmentally-themed projects. Providing educators with the funding necessary to bring to life environmental subjects has proven successful over the years but particularly in FY20. For the first time since the mini grant program was consolidated into a single, streamlined askHRgreen program, the entire \$10,000 budget was exhausted in one fiscal year. In all, the program supported 21 projects and awarded \$10,073 in grant funding. The funded projects reached nearly 8,100 students across Hampton Roads. While funded in FY20, many projects will be implemented in FY21 due to the early school closures caused by coronavirus. Examples of projects funded this fiscal year include pollinator gardens and habitat, meaningful watershed experiences, tap water tastings, native tree plantings, and support for in-school waste reduction programs such as composting and recycling.

Environmental Education Mini Grant Projects

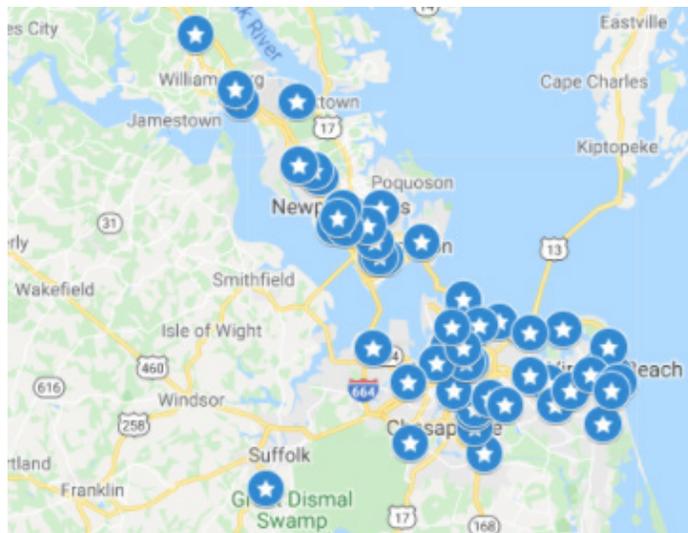

Project	Students	Project Description	School/Organization	City/County	Grant
Old Donation Eco-bus	1,500	This project will help fund a grease filtration system for Old Donation School's EcoBus (a functioning mobile sustainability classroom constructed from a decommissioned VBCPS school bus).	Old Donation School	Virginia Beach	\$500
Pollinator Garden for Girl Scouts	1	This project will help fund construction and planting of a garden to offer sanctuary, food, and water to native pollinators at the Norfolk Fitness and Wellness Center.	Girl Scout Council of the Colonial Coast Troop 176	Norfolk	\$413
Healthy Food, Healthy Life	530	This was Newtown Elementary School's fifth year in developing a vibrant learning garden for students to use as a real-world learning experience.	Newtown Elementary School	Virginia Beach	\$500
Get to Know Your Watershed	60	This project provided Green Run High School students a meaningful watershed educational experience through the Chesapeake Bay Foundation's boat field trip.	Green Run High School	Virginia Beach	\$440
Bee-utiful Learning Experiences	260	This project provided a new Bee Colony for Old Donation School.	Old Donation School	Virginia Beach	\$500
Drink More Water!	500	This project provided reusable water bottles and water tastings for Newtown Elementary School students.	Newtown Elementary School	Virginia Beach	\$500
Water for Caretakers and Children	500	The project provided an ecologically sensitive method of drinking water for children and caretakers by providing drinking water stations, a handwashing station, and paper cups for composting.	James River Elementary	Williamsburg	\$495
Vesting Up for Deeper Understanding	130	This project will fund youth life vests and dip nets for Old Donation School students to participate in an oyster restoration action project.	Old Donation School	Virginia Beach	\$450
Green Girls!	350	This project helped Girl Scout Council of the Colonial Coast Troop 1019 reinstate John G. Cary school's recycling program.	GSCCC Troop 1019	Hampton	\$260
Recycle for Change	900	This project will help establish four recycling bins in the Tabb High School Cafeteria and one recycling bin outside in the Tabb High School Sports Fields.	Tabb High School	Yorktown	\$500
Native Tree Project	84	This project provided funds for 100 native Eastern redbud bare-root seedlings, plastic nursery pots, and potting soil for Norfolk Academy.	Norfolk Academy	Norfolk	\$500
Green Readers – Kindergarten & Third Grade	1,900	This project provided a take-home book to every kindergarten and third grade student at 11 schools and volunteer guest reading in classrooms.	Norfolk Environmental Commission	Norfolk	\$1,000
Marlin Meadows	100	This project funded a Marlins Go Green environmental program on the Virginia Wesleyan University campus to incorporate a new sustainable garden on campus.	Virginia Wesleyan Uni-versity	Virginia Beach	\$500
The Bee Byway	2	This project will help establish a pollinator corridor called The Bee Byway through an unfragmented section of Newport News.	The Ruling Robot Falcons	Newport News	\$315
Hoffler Creek Polli-nator Program for Kids	25	This project funded the purchase of seeds, compost, and clay powder for each child to produce "seed bombs" (one egg carton of balls of compost, clay, and native wildflower seeds) for tossing at Hoffler Creek Wildlife Preserve to establish a pollinator garden.	Hoffler Creek Wildlife Foundation	Portsmouth	\$200
An Elizabeth River Project – Resilient River School	249	This project will help fund an ERP new Resilient River Star School program with Victory Elementary to green their schoolyard with over 100 native trees and 500 native water-tolerant plants to create new habitat and address frequent flooding.	Elizabeth River Project	Portsmouth	\$1000
Adopt-A-Pot	25	This project will restore the existing flower pots on the City of Hampton's main streets with pollinator-friendly plants.	Partnership for a New Phoebus	Hampton	\$500
Community Garden and Recycling Program	15	This project will restore Academy for Discovery at Lakewood's community garden to productivity and aesthetic standards as well as provide public awareness for recycling at the school.	Academy for Discovery at Lakewood	Norfolk	\$500
Composting Know-How	100	This project will provide signage for Williamsburg Community Grower's new three-part composting bin system that will educate community members regarding the three R's, how and why to compost, and how to properly use the composting system.	Williamsburg Community Growers	Lightfoot	\$500
Native Pollinator Habitat Stewardship	865	This project will provide native and pollinator plants to the Spratley Gifted Center's large schoolyard habitat.	Spratley Gifted Center	Hampton	\$500

Business Outreach

Bay Star Business Program

Since 2018, the askHRgreen.org Stormwater Education Committee has engaged local businesses committed to protecting the environment through the Bay Star Business Program. To become part of the free, pledge-based program, business owners sign up online by committing to environmental practices such as conserving water, recycling, cleaning up and preventing litter, properly maintaining company vehicles, organizing a community cleanup, and more. Participation in the program lets Hampton Roads consumers know a business is committed to implementing environmentally-friendly practices in their day-to-day operations. Most action items are also no- or low-cost changes which can help a business run more efficiently while conserving natural resources. Participating businesses receive a welcome packet filled with business-centric information from askHRgreen.org and Bay Star Business window clings to display in their office or on company vehicles. Bay Star Business Partners are also recognized through the askHRgreen.org website and social media accounts. The increased exposure is an incentive for participating and an easy way to thank businesses for doing their part to protect local environmental quality. In FY20, the Bay Star Business program added 15 new partners for a total of 50 diverse participants including multi-family housing developments, landscapers, industrial and professional service providers, plumbers, restaurants, and retail establishments

Fats, Oils, and Grease (FOG) Commercial Training and Certification Program

The regional FOG training and certification program is designed to educate local food service workers and grease haulers on how to prevent sanitary sewer backups caused by improper handling and disposal of fats, oils, and grease. FOG certification requirements vary by locality, and the free certification program is available to anyone through the HRFOG.com website.

Various updates and enhancements were made to HRFOG.com during FY20. The website was converted to a responsive design site, ensuring a user-friendly experience for visitors on any type of device: mobile, tablet, or desktop. In addition, the grease hauler and food service worker training programs and certification tests were updated to reflect modern changes in local FOG program administration and industry best practices.

In FY20, the FOG Education committee updated the Grease Control Device Enforcement Memorandum of Agreement (MOA) between HRSD and participating localities. The updated MOA was approved by the regional Directors of Utilities Committee and several localities have formally adopted it. Due to COVID-19, the adoption process was delayed in some municipalities but it is anticipated that all MOAs will be completed in the coming year.

In January, the FOG Education Committee hosted a full-day training course through Ken Loucks' Interceptor Whisperer FOG Institute Training Program. Registration for the training was open to utility employees across Hampton Roads as well as the general public and those

who attended received a comprehensive education in commercial grease interceptors: how they work, product standards, how they are regulated through the plumbing code, and how to properly size, select, and maintain them.

Illicit Discharge Rack Cards

Certain industries have a greater potential to discharge harmful waste into the stormwater system and local waterways through the course of their work. The askHRgreen.org Stormwater Education Committee continued to distribute industry-specific rack cards for the following high priority industries: lawn care and landscaping, automotive services (such as car dealers, repair shops, and fleet maintenance), and animal services (including animal boarding facilities, animal shelters, pet groomers, and veterinary offices). Each rack card addresses potential sources of pollution and provides industry best practices to prevent illicit discharges.

WORKING TOGETHER FOR CLEAN, HEALTHY WATERWAYS

GOOD TO KNOW
How we maintain vehicles plays an important role in keeping local waterways clean.

- Outside operations and maintenance activities can contaminate stormwater runoff.
- Motor oil, anti-freeze, gasoline, and brake fluid contain toxic chemicals and metals that pollute local waterways.
- Wash water contains detergent, dirt, and other pollutants that harm the environment and are illegal to discharge.

The Source of Stormwater Pollution

- Vehicle leaks.
- Washing vehicles on paved surfaces.
- Improper chemical storage.
- Waste from grinding, painting, coating, sanding, or parts cleaning.

The Impact of Stormwater Pollution

- Chemicals and metals contaminate local waterways making them unsafe for swimming.
- Contaminated wash water clouds waterways harming aquatic life.

Following best management practices protects our waterways.

WORKING TOGETHER FOR CLEAN, HEALTHY WATERWAYS

GOOD TO KNOW
Lawn care, landscaping, and pest control practices can impact water quality.

When it rains, soil, mulch, leaves, grass clippings, fertilizers, pesticides, and herbicides flow across yards and paved areas, winding their way through streets and storm drains before entering our local waterways.

The Causes

- Poorly positioned sprinklers waste water and increase the flow of pollutants into storm drains.
- Leaves, grass clippings, and tree coverings that are swept or blown into the street can clog storm drains and pollute our waterways.
- Fertilizers, pesticides, and herbicides that wash off lawns and landscaped areas contaminate waterbodies.

The Impact

- Yard waste encourages algal blooms to form, robbing the water of oxygen.
- Lawn chemicals harm fish and other aquatic life.
- Streets flood easily when storm drains are clogged with yard waste.

Following best management practices protects our waterways.

WORKING TOGETHER FOR CLEAN, HEALTHY WATERWAYS

WHAT TO KNOW
Grooming, and other pet care activities like cleaning products and waste materials if not disposed of properly, can pollute waterways and harm the public.

The Water Flows

City sewer and stormwater systems are separate designed to manage water in different ways. The sewer system carries wastewater to a treatment plant. The stormwater system carries rain and city to local waterways, picking up dirt, debris, pet poop, etc. along its path.

Source of Stormwater Pollution

Waste is not fertilizer. It is filled with harmful germs and bacteria that, if not disposed of properly, can harm people, pets, and wildlife. Cleaning products (even those labeled "pet safe") can be toxic to aquatic life or other solids in wash water can cause clogs in the sanitary sewer system.

The Impact of Stormwater Pollution

Cleaning products and pet waste contaminate local waterways, making them unsafe. They also harm and shellfish harvesting areas close.

Following best management practices protects our waterways.

a communication strategy to reach building owners and operators with this important information. As a result, a detailed fact sheet, step-by-step instructional infographic, and how-to video were developed and distributed to media outlets and posted on local and regional websites. Because the group works together on other regional communication initiatives, we were able to coordinate this outreach effort and get that vital information disseminated in a timely fashion as businesses prepared to welcome back employees and customers.

1 FLUSH THE COLD WATER

Reopening a closed building or facility?

Don't forget to flush the water pipes.

When your building goes unused, the water in your pipes may become stagnant.

Before you reopen, be

- Remove and clean** the filters, screens and aerators from all faucets. Then turn on the **cold water** fully for every faucet in the facility.
- Start on the **lowest floor**, then move to the next highest floor, etc.
- All cold water outlets should be flowing at the **same time** during flushing.
- Flush toilets and urinals **two or three times each**. Don't forget to **flush kitchen sprayers and drinking fountains**.
- Empty the ice** from all ice-makers, then make and **discard two additional batches** of ice.

COLD WATER

LEAVE RUNNING 30 MINUTES

FLUSH THE HOT WATER

Flush for **at least 30 minutes** (longer for bigger buildings), turn off the faucets and outlets in the order as you opened them.

Flush the **hot water** and open all hot water outlets in the **same way** as you opened the cold water outlets.

Flush the **hot water** for **45 minutes** to ensure that all the water heater is flushed out.

Flush the **hot water** outlets in the **same order** as you opened them.

Hampton Roads business owners and operators seeking additional guidance should contact their local water utility department or visit hrpdva.gov/buildingflushing

NOTE Water heaters should be set to **at least 120 degrees** to prevent microorganisms from growing.

Events

Each year, askHRgreen.org participates in a variety of corporate and industry events across the region. In FY20, askHRgreen.org volunteers had a presence at corporate events for Huntington Ingalls/Newport News Shipbuilding, Anthem, professional landscapers at the Mid-Atlantic Horticulture Association Short Course, and municipal employee events. Additionally, askHRgreen.org engaged businesses through promotions such as Imagine a Day Without Water and Straw-Free September Days. Recognizing restaurants, breweries, and coffee shops as important partners for communicating the value of tap water and waste reduction continued to be a key strategy in FY20.

COVID-19 Water Quality Outreach

When local businesses that closed due to COVID-19 began preparing to reopen, stagnant water was a concern for building plumbing systems. The Water Awareness Committee worked together with the region's utility directors and the Virginia Department of Health to develop proper flushing guidelines and coordinate

2019-20 Promotional Campaigns

Waste Reduction

With turbulent recycling markets and changing municipal recycling contracts, the priority of the Recycling & Beautification Committee has increasingly focused on waste reduction. While recycling continues to be an important message, the waste reduction message helps residents decrease their waste contribution no matter the state of recycling. The committee's message for residents is that we should all choose to reduce our waste production first before focusing on what can and cannot be recycled.

Paid Media. A one-week radio and digital media campaign ran from September 16-22. The "Choose to Refuse" campaign focuses on single use plastics including bottled water, straws, utensils, take out containers, and plastic bags. Through this outreach, residents are urged to refuse disposable products and choose reusable alternatives. The campaign included radio, digital display ads and retargeting, native content ads, and social media. Throughout the year, specific waste reduction messages were also included in the Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. In support of the waste reduction message, the committee purchased reusable bags and distributed portable cutlery sets and reusable stainless steel straws at outreach events. All items provide a practical alternative to help residents reduce their use of single use disposable plastics.

Public Relations. Public relations efforts supported the waste reduction message through a variety of media channels including news releases, print coverage (Suffolk News Herald), and articles in the askHRgreen.org newsletter.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. Outreach included sharing waste reduction tips, upcycling projects, and stories about the negative environmental impacts of plastics and our throw away culture. The paid social media and digital campaign was the one of the highest performing in FY20, achieving 1,810 clicks.

SEPTEMBER 16 - 22, 2019 ONE WEEK

Waste Reduction / Choose to Refuse

Plastic Bag Recycling

The plastic bag is Public Enemy No. 1 to materials recovery facilities in Hampton Roads and nationwide. When tossed in with comingled recyclables, they get caught in machines, increasing processing time and harming equipment while posing a danger to employees tasked with removing them. In order to combat this nuisance contaminating the recycling stream, the Recycling & Beautification Committee launched a new plastic bag recycling campaign in the fall of FY20. The message for residents is that thin plastic bags and wraps can be recycled, just not in curbside recycling bins. They must be returned to local stores for collection and processing.

Paid Media. A one-week radio and digital media campaign ran from November 18-24 and included radio, digital display ads and retargeting, native content ads, social media, and pre-roll video ads. Plastic bag recycling messages were also included in the Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

Public Relations. Public relations efforts supported the plastic bag recycling message through interviews and articles in the askHRgreen.org newsletter.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram by sharing plastic bag recycling tips and videos.

NOVEMBER 18 - 24, 2019 ONE WEEK
Back To Basics / Plastic Bags NEW

Litter Prevention

Litter is a main focal area for the Recycling & Beautification Committee. In FY20, we once again partnered with Keep Virginia Beautiful to host the national kickoff of the Great American Cleanup. While the region-wide cleanup events planned for March 27-28 had to be cancelled due to the coronavirus, we're looking to mobilize individuals, families, and small groups in the fall of 2020 to host their own cleanup events in their neighborhoods and communities while safely practicing social distancing. The "Team Up 2 Cleanup" campaign was promoted in the following ways:

Paid Media. A one-week media campaign ran from March 2-8 on radio and social media. The purpose of the campaign was to educate residents about local litter problems and recruit volunteers to take action by joining the local cleanup events planned for the Great American Cleanup National Kickoff in Hampton Roads. Throughout the year, specific litter prevention messages were included in our Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. Through the Virginia Litter Prevention and Recycling Competitive Grant, the committee received \$5,000 to procure supplies needed to create 70 litter kits to distribute between 12 participating localities. Each litter kit includes one bucket, four litter grabbers, four safety vests, eight trash bags, 10 latex gloves, and one "Team Up 2 Clean Up" promotional

decal. The local litter control coordinators developed litter kit lending programs unique to their jurisdictions. Some simply hosted the lending program through their own litter control offices while others engaged various public-facing organizations including public libraries, community centers, and recreation centers to expand program access. The litter kit lending programs are a great way to encourage local cleanups by providing volunteers with the tools and resources to host their own.

Public Relations. Public relations outreach about litter prevention and cleanups was conducted via news releases and articles in the askHRgreen.org newsletter.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. Outreach topics included the negative impacts of litter, advertising cleanup opportunities, and reporting the results of local litter cleanups. The influx of masks and other personal protective equipment (PPE) ending up as litter in parking lots and sidewalks was a particularly hot topic on social media in the spring and early summer.

MARCH 2-8, 2020 ONE WEEK

Great American Cleanup / Team Up 2 Clean Up

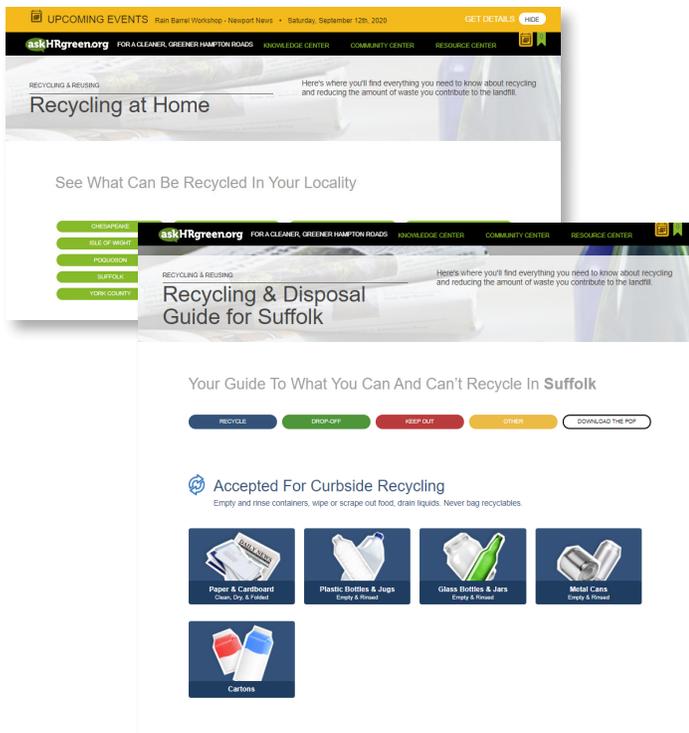

Residential Recycling Practices

For many, household recycling has become a habit, albeit a good one. If there is a number on the bottom of that yogurt cup or take-out container, many haphazardly toss it into the recycling bin hoping that it will get recycled. That good habit of "wishful recycling" creates a lot of contamination in the recycling stream. To combat that, the Recycling & Beautification Committee launched

a new recycling and disposal guide in preparation for America Recycles Day, November 15, 2019. The new online tool, available at www.askHRgreen.org/recycle, connects residents with easy-to-understand visuals of what can and cannot go in the curbside recycling bin, according to individual locality guidelines. It also features helpful information about items residents can drop off at convenience centers, as well as specialty curbside services offered by some localities such as bulk waste pickup and yard waste composting. The recycling tool is easy to use and even includes a downloadable one-page guide residents can print and display in their homes.

Public Relations. A press release was distributed in November announcing the new tool available on the askHRgreen.org website. It was featured in the Sunday, November 17, edition of the *Virginian-Pilot* and also in the askHRgreen.org newsletter.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. Outreach included sharing news about the new recycling lookup tool, answering recycling questions, and promoting local recycling information and collection events.

Suffolk Your Guide to What You Can and Can't Recycle

Accepted for Curbside Recycling
Empty and rinse containers, wipe or scrape out food, drain liquids. Never bag recyclables.

- Cardboard & Paper: Clean, Dry, Folded
- Metal Cans: Empty & Rinsed
- Plastic Bottles & Jugs: Empty & Rinsed
- Cartons
- Glass Bottles & Jars: Empty & Rinsed

These Recyclables Can be Dropped Off

- Cardboard & Paper: Clean, Dry, Folded
- Metal Cans: Empty & Rinsed
- Plastic Bottles & Jugs: Empty & Rinsed
- Cartons
- Glass Bottles & Jars: Empty & Rinsed

Keep These Out of the Recycling Container

- Plastic Bags: Return to store
- Food Waste
- Scrap Metal
- Tangles
- Diapers
- Styrofoam
- Greasy Containers
- Yard Waste: Leaves, Clippings, Debris
- Household Hazardous Waste
- Pet Food Bags
- Hangers
- Clothes: Donate

Fats, Oils & Grease (FOG) Disposal

The FOG Committee focuses each year on helping residents and local restaurants understand the sources of FOG (fats, oils, and grease) and best management practices that should be followed in order to keep this waste from contributing to sewer blockages and backups. This focal area was addressed with the following strategies:

Paid Media. The “Grease Grinch” campaign ran online for two weeks from November 25 – December 8. Ads included radio, digital display ads and retargeting, native content, social media, video pre-roll, and digital streaming TV. Throughout the year, specific FOG messages were included in the Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. The FOG Committee continued to distribute relevant promotional items including sink strainers, grease can lids, sponges, spatulas, and more.

Public Relations. Public relations supported public education and outreach through a variety of media channels including news releases, print coverage (The Virginian-Pilot Flavor Section), and multiple articles in the askHRgreen.org newsletter.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. Outreach topics included the negative impacts of improper grease disposal, fatbergs, canning the grease, and the importance of maintaining infrastructure.

NOVEMBER 25 - DECEMBER 8, 2019 TWO WEEKS
Grease Grinch

What Not to Flush

The FOG Committee continues to educate the public about proper flushing etiquette and the harmful side effects of flushing personal hygiene products, wipes, dental floss, cotton swabs, and more.

Paid Media. The committee created a new “What Not To Flush” media campaign that ran from April 6-12. The video shows a variety of commonly flushed items that should go in the trash, not down the toilet and reminds residents to only flush toilet paper along with their personal business. The engaging new video features colorful graphics and engaging audio to encourage people to do the right thing. The one-week media campaign included radio, digital display ads and retargeting, native content, social media, video pre-roll, and digital streaming TV ads. Throughout the year, specific what not to flush messages were included in the Google SEM campaign, driving traffic

to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. The FOG Committee continued to distribute washcloths, toilet stress squeezers, and “what not to flush” stickers in support of the message. In addition, the committee developed a “flush it or not” magnet game to be used as an engagement tool for future school visits and public events.

Public Relations. Public relations supported the what not to flush message through a variety of media channels including news releases, local TV news coverage (WVEC article), and the askHRgreen.org newsletter.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. Outreach topics included the damaging side effects of flushing trash, photos showing clogs due to wipes and rags, proper medication disposal, and the myth of flushable wipes. With the increased use of disinfecting wipes due to health and safety concerns regarding COVID-19, proper disposal of wipes became an important topic to promote via all of our outreach channels.

APRIL 6-12, 2020 ONE WEEK
What Not To Flush NEW CREATIVE

Communicating the Value of Water

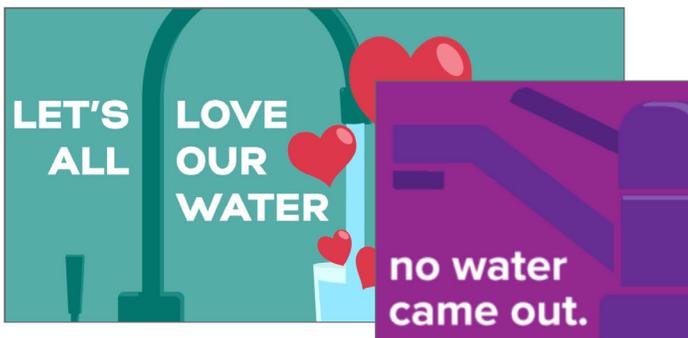

Water is the foundation of our community. From handwashing, a practice made exceptionally important during the COVID-19 pandemic, to cooking, and cleaning, water drives our quality of life in Hampton Roads. It’s also vital for our economy, fire protection, and the continued fight against the spread of illness. The Water Awareness Committee continued to focus on communicating the vital role water plays in our lives in the following ways:

Paid Media. The Water Awareness Committee conducted two media campaigns during FY20 that leveraged national water awareness initiatives as an opportunity for local outreach.

Imagine a Day Without Water. Celebrated each October, Imagine a Day Without Water is a national outreach campaign designed to highlight all the ways we use water each day. A two-week media campaign ran from October 14-27 featuring radio, static and retargeted digital display ads, native content ads, social media, and video pre-roll. The campaign utilized new creative for both radio and video assets. The creative theme included a rhyming poem with vibrant video animation highlighting all the things we'd miss on a day without water. The paid media campaign was supported by grassroots outreach through the partnership with local breweries and coffee shops with branded coasters and coffee sleeves distributed on October 23.

OCTOBER 14-27, 2019 TWO WEEKS

Imagine a Day Without Water NEW CREATIVE

Drinking Water Week. A one-week media campaign ran from May 4-10 as part of the national Drinking Water Week awareness campaign from American Water Works Association. The campaign included radio, static and retargeted digital display ads, social media, video pre-roll, and digital advanced TV. The campaign utilized an existing radio ad that covered “the honest truth about public water systems” while the video component featured interviews asking Hampton Roads residents what water meant to them. The digital display ads drove home the important role water infrastructure plays in hygiene, business, health care, and fire protection.

MAY 4-10, 2020 ONE WEEK

Drinking Water Week

Outreach Materials. The committee continued to distribute a variety of promotional items including reusable water bottles, mood pencils, sponges, toothbrushes, and more. Hydro flasks were a particularly engaging outreach tool this year as popular giveaway items for social media contests.

Public Relations. Public relations exposure came from features on various media channels including news releases, print coverage (Williamsburg-Yorktown Daily, Southside Daily, Hampton Newport News Daily, The Virginia Gazette), interviews with local radio and TV shows, and articles in the askHRgreen.org newsletter. Of particular note, the Imagine a Day Without Water campaign was featured on WTKR’s Coast Live program and in the Inside Business publication.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. The askHRgreen.org social media branding campaign promoted multiple value of water messages in support of both Drinking Water Week and Imagine a Day Without Water. Partnerships with local coffee shops and breweries got the value of water message in front of new and diverse audiences on social media. The hydro flask giveaways also drove engagement on social media.

Water Conservation

The Water Awareness Committee continued to raise awareness about conserving water in Hampton Roads. Central topics for this focal area include fixing leaks,

installing low flow WaterSense plumbing fixtures, and indoor/outdoor water conservation tips.

MARCH 16-22, 2020 ONE WEEK

Fix-A-Leak

Paid Media. As part of Fix-a-Leak Week, a nationwide campaign from EPA, a one-week radio and online media campaign ran from March 16-22. The campaign used existing creative including a “man on the street” video about water waste and how to find and fix a leaking toilet. The radio creative captured the similar tone of a “man on the street” interview parodying the sounds of household leaks. The campaign included radio, static and retargeted digital display ads, social media, and video pre-roll. Throughout the year, specific water conservation messages were also covered in our Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. The Water Awareness Committee distributed numerous promotional items to help residents conserve water including rain gauges, shower timers, toilet leak detection dye tabs, seed bookmarks, and hose nozzles.

Public Relations. Conservation messages were weaved into public relations through news releases, print coverage, interviews with local radio and TV shows, and articles in the askHRgreen.org newsletter. Of particular note, the topic of native plants was a popular one, featured in multiple media interviews.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. The askHRgreen.

org social media branding campaign covered water conservation topics ranging from rain barrels to fixing leaks to household usage tips.

Storm Drains & Illicit Discharges

The Stormwater Education Committee continues to educate the public about storm drains: what they are, where they go, and how they can contribute to local water pollution. The popular “only rain down the drain” message was incorporated into a variety of outreach campaigns during FY20 as the best management practices for storm drains overlap with other committee focal areas.

Paid Media. Throughout the year, storm drain topics were included in our Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. The committee added a new resource for the management of wild geese to its comprehensive library of informational brochures and rack cards addressing best management practices. askHRgreen.org also continued to promote the storm drain marking program.

Public Relations. Public relations supported this focal area through news releases, print articles, interviews with local radio and TV shows, and features in the askHRgreen.org newsletter. Two planned public relations efforts were delayed due to COVID-19. First, the committee planned to launch a series of sidewalk decals to promote the message “Every Day We Love the Bay, Only Rain Down the Drain” in conjunction with the Chesapeake Bay Foundation’s Clean the Bay Day litter cleanup in June 2020. That effort has been rescheduled for June 2021. Similarly, the committee has coordinated with 38 car washes on a “Thank You for Washing Wisely” campaign. The campaign recognizes the value of washing cars at commercial establishments with runoff capture instead of at home on paved surfaces. Originally planned for late spring, this campaign has been rescheduled to August 2020.

Social Media. We engaged with the community via Facebook, Twitter, and Instagram. Outreach included awareness of local water quality problems and a diverse variety of best management practices. The askHRgreen.org social media branding campaign was responsible for the majority of creative to support social media outreach.

Chesapeake Bay Restoration Fund Grant (CBRF). The committee was awarded grant funds to host four rain barrel workshops in FY20. The first two workshops were held in October 2019 in Newport News and Chesapeake. Spring workshops were scheduled for April 2020 in Hampton and Suffolk, however, COVID-19 stay-at-home orders forced a postponement. Once reopening guidelines were announced, the workshops were reimagined with

safety in mind. The Hampton workshop was split into two smaller events to maintain social distancing among participants. The Suffolk workshop was transitioned to a “take and make” curbside pickup where residents safely picked up their rain barrel and assembly kit from the City of Suffolk and assembled the rain barrels in their own home with the help of instructional tools. All four workshops were popular, sold-out events. The modest \$20 registration fee is a strong incentive for residents to participate. Thanks to this grant from CBRF, 60 affordable rain barrels are now helping to improve water quality in Hampton Roads.

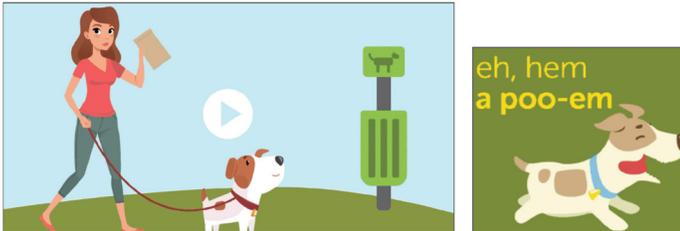

Pet Waste Disposal

In FY20, the Stormwater Education Committee continued to raise awareness about the importance of scooping the poop and the harmful impacts of bacteria-laden waste on local water quality.

Paid Media. The committee ran a one-week media campaign from June 1-7. The campaign used existing creative featuring a whimsical “poo-em” about cleaning up after your pet and the harmful impacts of pet waste on local water quality. The campaign included radio, static and retargeted digital display ads, social media, video pre-roll, and advanced TV. Throughout the year, pet waste and “scoop the poop” messages were also included in our Google SEM campaign, driving traffic

JUNE 1-7, 2020 ONE WEEK

Pet Waste

to the askHRgreen.org website from relevant keyword searches.

Outreach Materials. The committee purchased 5,000 dog waste bag holders to distribute at community events. The dog waste bag holders accompany scoop the poop rack cards with helpful information for residents.

Public Relations. The pet waste message was promoted in news releases, print articles, interviews with local radio and TV shows, and features in the askHRgreen.org newsletter.

Social Media. Social media is an important tool for sharing the “scoop the poop” message, and we utilized Facebook, Twitter, and Instagram in our outreach efforts. The public was encouraged to sign the scoop the poop pledge which resulted in 20 new pledges in just one week. Some who completed the pledge also included their pet’s name, a picture and their favorite place to walk. These pictures and details were used to extend the social media campaign through additional posts thanking residents who took the pledge and spotlighting their furry friends. The askHRgreen.org social media branding campaign was responsible for the majority of pet waste outreach on social media in FY20.

Pet Waste Station Grant Program. Since 2013, the askHRgreen.org Pet Waste Station Grant Program has made it easy for communities across Hampton Roads to add pet waste stations to their streets and common areas. Geared toward neighborhood associations, community groups, and property management companies, the regional program offers communities an opportunity to receive a free pet waste station to install and maintain in their neighborhoods. Approved applicants are responsible for installing the station, emptying the trash regularly,

and replacing the bags as needed. The neighborhood is also tasked with spreading the word about the location of the new pet waste station, the negative impact of pet waste on local water quality, and encouraging its use among dog-walking neighbors. Since the launch of the program, more than 382 pet waste stations have been awarded and installed across the region. Of those, 33 were awarded and installed during FY20.

Lawn Care & Fertilizer

Paid Media. After several years of reusing existing creative for lawn care campaigns, the committee invested in a new chalkboard art-inspired video and rhyming radio campaign. The creative highlights important best management practices including mulch mowing grass and fallen leaves, soil testing, composting, and keeping storm drains clear of yard waste and debris. The creative also highlights the negative impacts on aquatic life and marine habitat when best practices aren't followed. The new campaign creative was used in a one-week media campaign which ran from October 7-13. The campaign included radio, static and retargeted digital display ads, social media, and video pre-roll. Throughout the year, lawn care, native plants, fertilizing, and soil testing topics were included in our Google SEM campaign, driving traffic to the askHRgreen.org website from relevant keyword searches.

OCTOBER 7-13, 2019 ONE WEEK

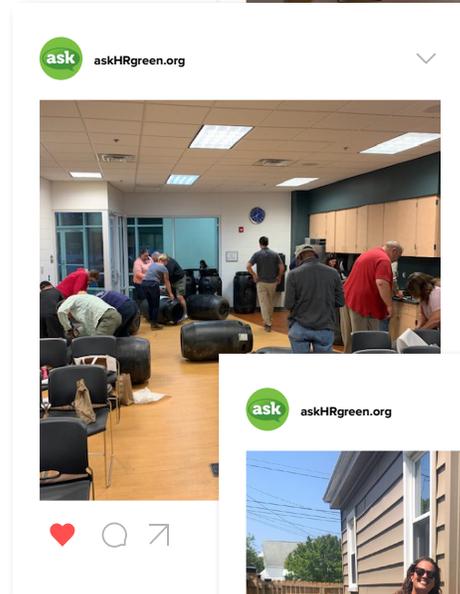

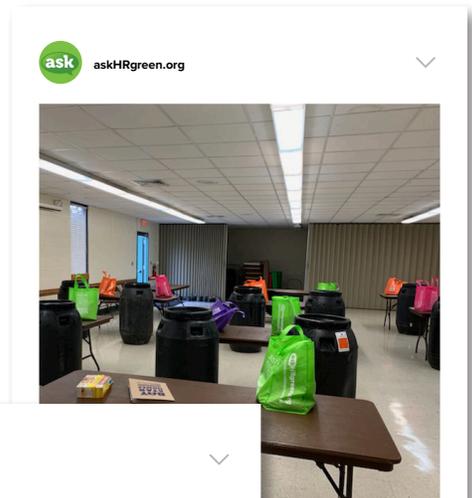

Lawn Care NEW CREATIVE

Outreach Materials. The committee distributes many brochures related to lawn care and fertilizer application including best management practices and how to take a soil test. Free soil test kits and native black-eyed Susan seed packets are made available to residents during public outreach events. The committee also conducts outreach to landscaping and lawn care professionals with a rack card specifically designed for more commercial applications.

Public Relations. Fertilizer and lawn care best management practices are commonly included in various public relations strategies throughout the year including news releases, print articles, interviews with local TV and radio stations, and features in the askHRgreen.org newsletter.

Social Media. Facebook, Twitter, and Instagram were utilized for sharing fertilizing and lawn care best management practices. Social media was also critical for promoting the four grant-funded rain barrel workshops held in FY20. The majority of lawn care and fertilizer messages shared through social media in FY20 were a part of the askHRgreen.org social media branding campaign.

2019-2020 Media Campaign Results

SEPTEMBER 16-22 “Choose to Refuse: Waste Reduction”

Katie Cullipher & Rebekah Eastep: Earth Day tips for the virus crisis

By KATIE CULLIPHER and REBEKAH EASTEP FOR THE VIRGINIAN-PILOT | APR 22, 2020

Our Earth has experienced heart-breaking loss of life over the past few weeks spread across the globe at a seemingly unstoppable pace. As inhabitants of this planet, we have been doing our part to slow the march by washing our hands, keeping a safe distance from others.

We're anxious and yearning, frustrated and tired — not exactly in the mood for the anniversary of Earth Day today. And while askHRgreen.org and the program won't be marking this golden year with the fervor and passion of yore, there are still things we can do on Earth Day — and every day — to take care of our planet:

- Conserve water by turning off the faucet while you are singing "Happy Birthday" to your hands.
- Keep up with your recycling efforts; this service hasn't stopped.
- Be conscientious of what you flush down the toilet; so-called "flushable" wipes and facial tissue are not flushable.
- Plant a victory garden. Like Americans who weathered World War II, planting vegetables, fruits and herbs to help provide food for their families is a therapeutic experience of working in a garden.
- Enjoy a "lights off" hour in the evening. Dine by candlelight and turn off electronics when not in use.
- If you're ordering a meal in, say "no thanks" to plastic utensils, straws, and condiments.
- Declutter your home and set aside the good stuff for donation.
- Reserve a quiet corner of your yard and let nature do its thing (and you can enjoy it).
- And finally, for this Earth Day especially, take a moment to be present with your favorite outdoor spot.

FEEDBACK

This regional guide will offer local recycling tips for confused residents

Hampton Roads officials launch illustrated plan

By KATHERINE HAFNER Staff writer

You don't want to be a "wishful recycler." Drawing the ire of the industry, these people throw just about anything into the blue bin, hoping for the best. But at least a fifth of everything that goes in is likely getting tossed and can have serious contaminating effects on other recyclable items or jam up machinery at your local recovery facility.

That's why the Hampton Roads Planning District Commission and AskHRGreen.org, a regional education initiative, just launched an illustrated online recycling and disposal guide in cooperation with 17 Hampton Roads localities, from Virginia Beach to Smithfield to Gloucester and James City County.

"Contamination has always been a hot topic in our recycling education efforts. What you can recycle at work in one city may or may not be the same as what you can recycle at home in a different city," Katie Cullipher, environmental education planner for the commission, said in an email.

"The goal of our new tool is to provide a reliable resource for recycling and disposal information to help citizens improve the quality of recycling in Hampton Roads," Cullipher said the

Sorters sift through recycling as it passes by on a conveyor belt, pulling out items that cannot be recycled or will damage the machinery at TFC Recycling in Chesapeake.

groups have been working on the guide for over a year, pausing briefly as some member localities — such as Norfolk — worked out their recycling contracts.

It's especially important, she added, in a military community with people constantly moving "from other parts of the country where their curbside recycling programs may look really different from ours."

The short answer for what you should be recycling is paper, bottles and cans. Not anything with food waste — ahem, pizza boxes — or plastic wrapping and bags. But each city is a bit different.

You can click on your city on the new guide and check out which items are a no-go, as well as what can be dropped off or picked up by specialty curbside services such as yard waste composting. Regional leaders also urge you to reduce waste in the first place, as well as reuse materials.

You can access the new site at askhrgreen.org/gtk-gtd/recycling-lookup.

The issue of wishful recycling has been made more urgent in the wake of China's crackdown on contamination. The recycling industry has been struggling to recover after the country stopped accepting most of our recycling early last year.

"With recycling programs across the nation struggling to turn a profit, improving the content of our curbside recycling bins is more important than ever," Cullipher said. It's "the perfect time to bring attention to the important issue of recycling contamination and what each of us can do to recycle right."

If you've dedicated more time to your garden 🌱 during this pandemic, you might want to know how to make your own compost to keep it healthy. This rich, organic material, added to your soil to help plants grow, is made up of food scraps and yard waste. (It's a double win in that you keep all that out of the landfill!)

The secret? Equal amounts of "browns" and "greens," mixed with a little water. Browns include dead leaves, branches, and twigs, while greens include grass clippings... [See More](#)

👉 These days, there's a new kind of litter: Pandemic litter. 📌

And by that, we mean the used masks, gloves and wipes that have been tossed to the ground, littering parking lots, grocery store entrances and other public spaces.

Sure, these are strange times. Everyone's working hard to protect themselves and their families. And that's good.... [See More](#)

This week we celebrate Drinking Water Week 💧 Now more than ever, we are keenly aware of the value of this most precious resource and its support of public health. Preventing the spread of COVID-19 depends on handwashing and social distancing, two things made possible in part by tap water and the region's water systems. 🌊👍

So let's raise a glass of refreshing tap water to all the water professionals behind the scenes who bring us this life-sustaining service. 🙌👏

It was the turtle seen around the world. In 2015, marine conservation biologist Christine Figgener posted a now viral video of an olive ridley sea turtle with a nearly five inch straw lodged in its nostril and changed the world. This week's easy environmental lesson plan covers the issue of litter and marine debris from land to sea, discussing the negative environmental impacts and the simple ways we can all make a difference.

Easy Environmental Lesson Plans: Wastewater Treatment - AskHRGreen

Terms

added value

Earned but unpaid advertising value.

ad group

In Search Engine Marketing (SEM), an ad group contains one or more ads which target a shared set of keywords.

average position

A ranking system that determines where your search engine marketing ad will display on a web search results page (i.e. top of page v. bottom of page).

bounce rate

The percentage of visitors who enter the site and “bounce” (leave the site) rather than continue viewing other pages within the same site.

click through rate (CTR)

A way of measuring online advertising. The CTR of an advertisement is defined as the number of clicks on an ad divided by its impressions, expressed as a percentage.

cost-per-click (CPC)

The cost associated with a person clicking on a display ad in search engine marketing.

exposure value

The combination of advertising cost, added value, and public relations value.

frequency

The number of times an individual (among the target audience) is exposed to the message.

impressions

The number of times an advertisement or public relations placement can be seen or heard by an audience.

public relations value

The equivalent advertising cost of a public relations article, interview, internet placement, etc. times three. Because a public relations placement has a higher value with an audience than advertising, it is assigned a higher value.

reach

The number or percentage of people within the target audience who are exposed to an advertising message at least once over a specific period of time.

search engine marketing (SEM)

The process of attracting traffic to a website from search engine results pages on a pay-per-click basis.

search engine marketing (SEO)

The process of improving the quality of a website so that it appears higher in natural (“organic”) search results.

unique visitors (users)

The number of people who visit a website within a specific period of time. If they visit more than one time within the period, their initial visit as well as their subsequent visits are counted as sessions. A user may have one session or multiple sessions.
