NEWPORT NEWS

RE: Hampton Roads Region- Norfolk and Virginia Beach JLUS Dear CAPT

NORFOLK

The Hampton Roads Region - Norfolk and Virginia Beach Joint Land Use Study (JLUS) is now underway. The JLUS is a cooperative planning process with the cities of Norfolk and Virginia Beach, the Commonwealth of Virginia, and the following four (4) Navy installations: Joint Expeditionary Base Little Creek-Fort Story; Naval Air Station Oceana (including Dam Neck Annex and excluding Naval Auxiliary Landing Field Fentress); Naval Station Norfolk, and Naval Support Activity Hampton Roads. The Hampton Roads Planning District Commission (HRPDC) is the lead sponsor for the JLUS.

POQUOSON

PORTSMOUTH

SMITHFIELD

SOUTHAMPTON

The JLUS planning process will identify recommendations and strategies that, when implemented, will prevent the introduction of incompatible civilian development or other related impacts and protect the ability of the Navy to conduct its operations.

SUFFOLK

SURRY

As part of this process, the consultant team led by AECOM would like to conduct **stakeholder interviews** with personnel from JEB Little Creek-Fort Story during the period of **June 5-8, 2017**. The purpose of the interviews is to gain an understanding of the compatibility challenges your installation faces and discuss opportunities for strengthening the relationships between the Navy and surrounding communities.

VIRGINIA BEACH

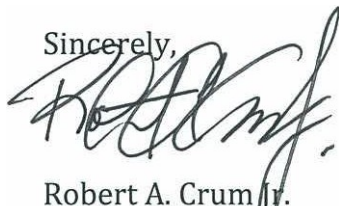

WILLIAMSBURG

YORK

We propose to work with Ms. Mercedes Holland, CPLO, to identify a preferred day and to schedule interviews during this timeframe at the installation. A list of installation stakeholders has been identified in consultation with the regional and installation Community Plans Liaison Officers and is included at the end of this letter. Ms. Delceno Miles, from The Miles Agency, is leading the public engagement outreach effort for the AECOM team and will work directly with your CPLO to ensure an efficient and inclusive scheduling process. We will be following a similar process for scheduling and conducting interviews at each of the other installations involved in the JLUS as well as regional personnel. If you identify additional personnel that you believe will be informative to this outreach effort, please let us know and we will include them in the stakeholder interview process.

Thank you in advance for your support of the JLUS process and this important study. We look forward to meeting with the installation personnel. If you have any questions about the overall JLUS process, please do not hesitate to call me.

Sincerely,

Robert A. Crum Jr.
Executive Director
