

AGENDA

Stakeholder Meeting #1 – Chesapeake Bay Total Maximum Daily Load (TMDL) Phase III Watershed Implementation Plan (WIP)

August 2, 2018

1:00 P.M.

1. **Chesapeake Bay TMDL 101**

HRPDC staff will brief the group on the basis for the Bay TMDL, what has happened since the Phase II WIP, and what to expect for Phase III.

2. **What is unregulated urban land and where is it in Hampton Roads?**

The focus on the Phase III WIP for PDC's in Virginia is on unregulated developed lands. Staff will explain how the Bay program defines unregulated developed lands and show where these areas are in Hampton Roads.

3. **Best Management Practices (BMPs) for the unregulated developed sector**

Staff will review BMPs that were suggested in [Virginia's Phase II WIP](#) and [HRPDC's Regional Planning Framework, Scenario, and Strategies](#) to see what worked and what didn't in terms of structural and policy BMP recommendations. We will also review new urban BMPs that have been approved since the Phase II WIP.

4. **What is the status of on-site sewer in Hampton Roads?**

Another effort in the Phase III WIP effort is to evaluate on-site sewer systems in Hampton Roads; in particular staff will discuss ways we can obtain an accurate accounting of systems. Staff will also review Phase II WIP recommendations, BMPs available for Bay Program credit, and existing federal or state grants and programs that may be available for localities.

5. **Next Steps**

Two more stakeholder meetings, and smaller group meetings will be held prior to finalizing a BMP input deck for the HRPDC portion of the Phase III WIP. Suggestions are welcome for the expansion of any programs that may be working now but are under-funded.

Future Meetings:

Sept. 6, 1pm – 3pm, HRPDC Regional Board Room, 723 Woodlake Drive, Chesapeake, VA
Oct. 10, 10am – 12pm, James Room, City Center, 700 Town Center, Newport News, VA
