

AGENDA

Stakeholder Meeting #4 – Chesapeake Bay Total Maximum Daily Load (TMDL) Phase III Watershed Implementation Plan (WIP)

December 6, 2018

1:00 P.M.

HRPDC Regional Board Room
723 Woodlake Dr.
Chesapeake, VA

1. **Review of Combined Soil, Water, and Conservation District (SWCD) Area Meetings**
DEQ, DCR, and PDC staff reported out at combined meetings for SWCDs in Area III and Area VI. HRPDC staff will go over the highlights and programmatic actions that were identified during those meetings.

2. **HRSD Proposal**

A proposal has been put forward by HRSD that would reduce significant amounts of nitrogen and phosphorus in the James River. There is a possibility it could be rolled into the region's Phase III WIP to request state funds for addressing voluntary reductions. Stakeholders will discuss the merits of the proposal and next steps.

3. **HRPDC Phase III WIP BMP Input Deck & Programmatic Template**

HRPDC staff will review any new comments or suggestions that have been submitted since the last stakeholder meeting for the Programmatic Template. This is the last opportunity for stakeholders to provide comments to the input deck and programmatic template, which are due to DEQ by December 14.

Attachment: HRPDC DRAFT Programmatic Template

4. **Next Steps**

This is the final stakeholder meeting; the revised list of BMPs for the input deck, programmatic template, and final report will be submitted to DEQ by the December 14 deadline. Stakeholders will be given a copy of the final report and associated documents and be kept informed of the Commonwealth's response to the region's input.
